### **Parallel Sessions**

1330 – 1500 hrs (IST)	<i>Parallel Session 1</i> <b>Biotech, Pharmaceuticals and Healthcare</b>
<b>Healthy People Healthy Minds</b> <i>Collaborate, Incubate and Develop World Class Healthcare Systems</i>	
<p><i>The quality of health care system and services in the society is considered as one of the crucial factors that define a Government in a certain state. Health care system and services may vary from one country to another, given the health care policies of that certain state (or region). With the recent public health crisis, it is important for countries to collaborate with each other on factors impacting the international health agenda and would also impact the social and trade relations between nations. This would entail collaborating for an effective disease control communication strategy and setting up a pandemic response system. Other potential areas of collaboration are tele-medicine, traditional medicine and global health policies. Health care is a very important factor to determine the physical and mental well-being of the people, that is why it is also highly recognized as a great contributor to a country's economy. The session would aim to provide insights on the current scenario that demands a need to collaborate and build a conducive ecosystem and define the actionable strategies and the role that the Industry would play towards achieving a better and healthier world.</i></p>

1330 – 1500 hrs (IST)	<i>Parallel Session 2</i> <b>Future of Clean Energy: Opportunities and Challenges</b>
-----------------------	--

*The focus of energy and power systems across the globe is shifting to incubate affordable and reliable clean energy sources. The international Energy Agency (IEA) estimates that by 2035 USD 16.9 trillion investments will be required to achieve the three goals of energy access, energy sustainability and energy security across the globe. Huge investments are required to deploy low cost energy solutions through wind, solar and hydro power systems, increasing access to clean energy. There is a need to look at smarter, intelligent and flexible electricity grids ensuring end-use efficiency through power system transformations. The access to clean resources in the ASEAN and OCEANIC region paves the way to initiate the efficacy of clean energy reforms, agendas and ensure governments of the regions come together to look at possibilities to support partnership activities, complimenting stakeholder coordination and outreach.*

**SESSION IV**

<p>0900 – 1015 hrs (IST)</p>	<p><b>CEO Roundtable</b></p> <p><b>“Trade and Investment Opportunities in Current Times”</b> – Collaborate to Mitigate Economic Damage</p>
<p><i>The Covid-19 outbreak has brought in a great degree of uncertainty into the world of global trade and investment. The world trade and investment both have faced severe hit following the outbreak of pandemic. According to the UNCTAD’s World Investment Report, The COVID-19 crisis will cause a dramatic fall in FDI. Global FDI flows are forecast to decrease by up to 40 per cent in 2020, from their 2019 value of \$1.54 trillion. This would bring FDI below \$1 trillion for the first time since 2005.</i></p> <p><i>The disruption has shaken the very foundation on which the system of Global Value Chains were based. Companies are now looking at alternative markets both for investment and sourcing of imports to diversify their risk. The question that remains to be answered is where is this investment headed to? Is it headed back to the country of origin of the MNC or is it seeking out new destinations? How can India work with the ASEAN and Oceanic region to help create new GVCs in different sectors and tap these new investment opportunities? What needs to be done to facilitate this process?</i></p>

1030 -1200 hrs (IST)	<i>Parallel Session 2</i> <b>Agri, Food Processing and Allied Products</b>
<b>Regional Food security &amp; sustainable supply chain networks.</b>	
<p><i>The region is increasingly impacted by climatic shocks, inadequate farming infrastructure and disruptions leading to significant impact on sufficient output, access, availability and utilization of food. The current COVID 19 situation has exacerbated and heightened food security risks in the region with disruptions to domestic and international food supply chains caused by rising health risks, restricted mobility due to closing of borders and travel restrictions including maritime shipping, stalled capital investments and access to farm inputs, thus leading to increasing food prices and undermining the availability and accessibility of food. It has also further exposed vulnerable groups to risk of micronutrient deficiency due to reduced access to safe, diverse, and healthy food. While on the demand side, food consumption is holding up and showing signs of resilience, the pandemic-induced economic slowdown, reduction in food imports, trade restrictions and disruptions in major import trading partners can further negatively affected food security in region. In such a scenario it is all the more imperative for nations to build integrated and sustainable supply chains to insulate from the current and future pandemics and crises. To enhance resilience and productivity, it is crucial that post-COVID-19 reforms strengthen supply-chain, boost efficiency and competitiveness, reduce risks along the value chain, and strengthen food security in the region. The sessions aims to deliberate on the current state of affairs and possible ways in which countries and businesses can come together to solve the food security issue in the region.</i></p>

## Day 3 – 6 August 2020 – Thursday

### SESSION VI – Parallel Sessions

0900 -1015 hrs (IST)	<b>Country Session – Vietnam</b>
<p>India is amongst Vietnam’s top 10 trading partner. Vietnam has been emerging as a pivotal state in India’s “Act-East” policy which is reflected in the multidimensional cooperation between the two countries. India and Vietnam have been cooperating in various regional forms such as the East Asia Summit, ASEAN, Mekong Ganga Cooperation besides UN and WTO and the Asia-Pacific Economic Cooperation (APEC). While bilateral trade between the two countries has increased in recent years with some of the major sectors of cooperation being Coffee, Pharmaceuticals, Energy, Machinery and Equipment, Mobile Phones and accessories etc, more needs to be done to fully realize the true potential of this economic and commercial partnership. India &amp; Vietnam elevated their bilateral relations to “Comprehensive Strategic Partner” given the burgeoning economic and friendly geo-political relations. Industry on both sides can lead the charge in deepening our economic ties and further strengthening our regional cooperation that leads to mutual growth and development of the region and our people.</p>

## **SESSION VII- Parallel Sessions**

1030- 1145 hrs (IST)	<b>Parallel Session 1</b> <b>Country Session Australia</b>
<p><i>The India-Australia bilateral relationship has evolved into a Strategic Partnership based on long-standing people-to-people contact and enhanced bilateral economic relations. Both sides have drawn up detailed strategies to enhance bilateral economic cooperation. India can leverage its strengths in key commodities and has the potential to increase its exports of goods and services to Australia from USD 5 billion in 2018 to USD 15 billion in 2025 to USD 35 billion in 2035. Australia, on the other hand is seeking to step up investments in India from \$10.3 billion to over \$100 billion. There is a strong reason to believe that this is perhaps the ideal time to discuss concrete steps detailing the actions that are required by each country. The session aims to explore opportunities for both countries to navigate together through the COVID 19 crisis to overcome the global challenges and how India and Australia catapult their business relationship to the next level.</i></p>	
1030 – 1035 hrs (IST) - 1500 – 1505 hrs (AEST)	Opening remarks <ul style="list-style-type: none"> <li>• <b>Mr DD Saxena</b> Managing Director, Oil Seeds Australia &amp; Chairman, CII-IBF Australia</li> </ul>

1030- 1145 hrs (IST)	<p><i>Parallel Session 2</i>  <b>Country Session -Singapore</b></p> <p><b><i>“India-Singapore: The next chapter of economic partnership”</i></b></p>
<p><i>India Singapore bilateral partnership is rooted in strong commercial, geo-political, economic, cultural and people-to-people links. The COVID 19 pandemic has altered global business environment, brought on health risks, pushed countries to close borders, disrupted supply chains, negatively impacted growth, lives and livelihoods. As India and Singapore navigate the challenges brought on by the pandemic, it has become important for our nations and businesses to look at not only the traditional areas of collaboration but also the newer areas and sectors of focus. As stabilizing forces in the region and with Singapore’s technological excellence and India’s huge market, resources and talent pool both countries can work together to build sustainable supply chains, co-create technologies of the future and drive growth and development for our people. The session aims to discuss the next chapter of this burgeoning economic partnership that leads to increasing trade, investment and security.</i></p>

1200- 1330 hrs (IST)	<i>Parallel Session 2</i> <b>Logistics and Supply Chain</b>
<b>Re Calibrating the Regional Supply Chain &amp; Logistics</b>	
<p><i>ASEAN and Oceanic countries along with India have recently started focussing on the blue economy model that involves harnessing the marine resources, given the abundance of the oceans and seas surrounding their mainland. As ASEAN countries and India share vast common maritime domain, it has been an important medium for stronger cultural and commercial linkages. Maritime connectivity is an important aspect of the blue economy, as it leads to lower logistics cost, and in turn increases trade of goods and services.</i></p> <p><i>The Indian Ocean has trade routes that carry almost 50 per cent of the world’s container ships and has approximately 33 per cent of the world’s bulk cargo traffic. Around 66 per cent of the world’s oil shipments happen in this region with a Combined population of member states is nearly 2.7 billion people</i></p> <p><i>India has increased focus on the blue economy, with a significant investment commitment of about USD13 billion were made in shipping, ports and allied sectors by India very recently. Further, the Government of India has announced that it plans to invest USD190 billion over the next ten years to develop 27 industrial clusters, to improve connectivity with ports through new rail and road projects.</i></p>
